CLEANLINE BEERLINE CLEANER AND MACHINE GLASSWASHING PRODUCTS

Beerline cleaning and glasswashing for the perfect serve post Covid-19

Pubs, bars and restaurants will be able to serve food and drink to customers in outdoor areas from mid-April under plans to ease England out of lockdown. Before licensed premises resume service, it is essential that beerlines are in good shape, and that all glassware is clean and smear-free, so that returning customers receive a hygienic and appealing welcome.

Beerline systems require regular cleaning because over time deposits of limescale, beer stone, yeast, hops and proteins, as well as bacteria, can build up on the dispensing lines, which affects the quality and flavour of the beer. Glasswashing machines must operate at a high standard to ensure that customers receive a perfectly clean and sparkling glass every time.

Beerline cleaning for clean and hygienic lines, tanks and taps

Cleanline Detectable Beerline Cleaner

Cleanline Detectable Beerline Cleaner is a powerful chlorinated alkaline detergent with a colour-indicating additive specifically formulated to clean beer dispensing lines, tanks and taps.

- ✓ Regular treatment keeps lines clear and reduces the possibility of the beer fogging or changing flavour.
- ✓ Colour changing additive indicates the state of cleanliness.
- ✓ Removes yeast and bacteria which accumulate on plastic beer dispensing lines during normal usage.
- ✓ Will not adhere to the plastic line, so tainting and head retention problems are totally eliminated.
